Mohali, Punjab, India

PROFILE SUMMARY

Analytical and detail-oriented **B.Tech CSE undergraduate (2027)** with strong problem-solving, research, and communication skills. Experienced in structured analysis, translating complex problems into actionable insights, and working across end-to-end project workflows. Interested in consulting-style roles, business analysis, and fast-paced startup environments.

EDUCATION

Chandigarh Group of Colleges, Mohali Bachelor of Technology – Computer Science & Engineering	July 2023 – June 2027 CGPA: 8.6
J.D. Sr. Sec. School, Hisar Senior Secondary (Non-Medical)	April 2021 – March 2022 Percentage: 92%
J.D. Sr. Sec. School, Hisar Secondary School (Class X)	April 2019 – March 2020 Percentage: 98.6%

CORE SKILLS

- Analytical & Structured Thinking
- Qualitative and Quantitative Analysis
- Research and Insight Generation
- Consulting-style Problem Solving
- Stakeholder Communication and Presentation
- Multi-tasking and Ownership Mindset

TECHNICAL SKILLS

Programming Languages: C++, Python, SQL

Frameworks & Tools: Flask, GitHub, VS Code, Jupyter Lab, Google Colab

Databases: MySQL, Oracle

Computer Science Fundamentals: DBMS, OOPS, Computer Networks, Operating Systems (Basics)

Productivity Tools: ChatGPT, Claude AI, Emergent AI

PROJECT EXPERIENCE

Personal AI Assistant

Python, APIs, SpeechRecognition

- Built a voice-controlled AI assistant to automate daily tasks such as web search, application handling, and information retrieval.
- Applied structured problem decomposition to convert user requirements into modular functionalities.
- Demonstrated end-to-end ownership from requirement analysis to implementation.

Lost & Found Web Application

Flask, MySQL, HTML, Jinja2

- Developed a full-stack application with secure authentication and database-driven workflows.
- Analyzed user behavior to design efficient reporting, searching, and reclaim mechanisms.
- Improved usability and system reliability through structured backend design.

CERTIFICATIONS

- AWS Training Certificate – Foundational understanding of cloud concepts including compute, storage, and deployment basics.

ACHIEVEMENTS

- Secured **7th Rank in Code Rush**, a competitive coding contest demonstrating strong analytical thinking under time constraints.
- Solved 100+ problems on LeetCode and GeeksforGeeks.
- Regular practice of data structures, algorithms, and problem-solving techniques.
